# Cork Spastic Clinic

The Cork Spastic Clinic is the only clinic caring for Cerebral Palsy children in the South of Ireland outside Dublin. Starting in 1955 with 14 patients, we now have nearly 100 from all parts of Munster. Our facilities include schooling, physiotherapy, speech training and habilitation, and some of our children are residential.

Already this year the building has been extended to the full capacity of the site, but it is still too small for our needs and our next big project is a new school alongside the present clinic.

Cerebral Palsy is a condition causing paralysis in children. It may be due to disturbance of the normal development of the brain before birth, to injury during birth, or to illnesses or injury in early life.

Because of their inability to move properly these children do not make the progress we take for granted in normal children, from sitting to standing and finally to walking and their speech is often affected. This backwardness is ascribed all too frequently to mental defect and considered hopeless. In fact many of them have normal intelligence and are treatable.

The treatment consists essentially in teaching a new way of moving, to compensate for the lack of normal muscular control. For the person with cerebral palsy the most ordinary activities are highly skilled accomplishments which must be acquired slowly and practised constantly. With proper training, begun early, suitable cases can go to ordinary schools and follow ordinary careers afterwards; others need special schools, and probably, protected occupations. In almost all cases it is possible to make the victims of cerebral palsy less dependent on others for their care, whether at home or in institutions.

*The Committee of the Cork Spastic Clinic  
wish to thank the advertisers and all others  
who helped to make the Concert a success.*
